What is an Article?

An article is a small word that comes before a noun (a person, place, animal, or thing). Articles help us know whether we are talking about something in general or something specific.

Article adalah kata kecil yang diletakkan sebelum kata benda, seperti nama orang, tempat, hewan, atau benda. Article membantu kita mengetahui apakah kita sedang membicarakan sesuatu secara umum atau sesuatu yang sudah jelas atau tertentu.

Types of Articles

1. Indefinite Article (a, an)

The articles a and an are called indefinite articles. They are used to talk about a person, place, animal, or thing in general or for the first time.

Example : a bird, a book, an egg, an umbrella, an apple.

2. Definite Article (the)

The article the is called the definite article. It is used to talk about one specific person, place, animal, or thing that is already known.

Example : the teacher, the book, the classroom.

When do we use articles?

We use article:

- before a singular countable noun.
- when talking about one person, animal, place, or thing.
- to show if something is general or specific.
